EDUCATION

Chennai Institute Of Technology : B.Tech Information Technology	3rd Year
Coursework: Software Development, Computer Networks, Operating System	Sep 2024– May 2028

EXPERIENCE

Software Engineer Intern - Zidio Development	<i>[March 2025 - May 2025]</i>
- Designed and developed scalable web applications using Java, Spring Boot, React.js, and SQL. - Built and integrated RESTful APIs to connect backend services with dynamic frontend interfaces. - Implemented secure authentication mechanisms and role-based access control. - Optimized backend logic and database queries to improve application performance. - Collaborated in an agile development environment, contributing to feature implementation and code reviews.	

PROJECTS

Kshitij - AI for education	https://github.com/Prithiv04/Kshitij
<i>Python, TensorFlow, PyTorch, Flask, MongoDB, React.js, Tailwind CSS.</i>	
- AI-Powered Personalization: Kshitij uses advanced AI to analyze learning patterns and deliver customized lessons, ensuring every student learns at their own pace. - Smart Analytics & Feedback: Real-time performance tracking and emotion-aware feedback help students identify strengths and improve continuously. - Futuristic & Intuitive Interface: A sleek, user-friendly UI enables seamless interaction, instant assessments, and engaging visual learning experiences.	
IBM Quantum Platform Backend Analyzer & Job Orchestrator	https://github.com/Prithiv04/Decohereex
<i>Python Qiskit IBM Quantum Aer Simulator Scikit-learn NLP Supabase</i>	
- Built a platform to submit and manage quantum jobs directly on IBM Quantum backends, with Aer-based simulation for pre-execution validation. - Implemented natural language - Qiskit code generation, enabling users to describe quantum circuits in plain English. - Designed a backend recommendation engine using a Random Forest model, selecting optimal IBM Quantum devices based on constraints like shot count, error rates, queue time, and user latency tolerance. - Built dashboards to visualize historical IBM Quantum backend statistics enabling informed backend comparison.	
AI powered smart resume analyser	https://github.com/Prithiv04/resumeanalyser
<i>React.js Streamlit Python (spaCy, Gemini API) TailwindCSS Firebase</i>	
- Built an AI-powered resume analyzer with ATS scoring, keyword gap detection, and role-specific insights. - Designed a customizable resume builder with modern templates and real-time optimization feedback. - Integrated Gemini API for NLP-driven analysis and developed a secure admin dashboard for user management.	
Perforated AI Powered Optimization Platform	https://github.com/PerforatedAI/PerforatedAI
<i>React TailwindCSS Python FastAPI MCP Server AI Agents Machine Learning PostgreSQL</i>	
- Developed an AI-driven optimization platform using agent-based reasoning and machine learning to improve decision making and workflow efficiency - Implemented adaptive AI modules to analyze data patterns and provide dynamic recommendations for performance and resource optimization - Built scalable and modular architecture enabling real-time automation, predictive insights, and intelligent optimization across multiple use cases	

TECHNICAL SKILLS

• Python	• Solidity	• Mongo.DB	• FastAPI	• ReactJS	• Numpy
• PyTorch	• C++	• MySQL	• Pandas	• Javascript	• GitHub
• MCP	• Blender	• c#	• C Language	• RestAPI	• Git

CERTIFICATIONS

• PCAP : Programming Essentials in Python by CISCO	• Introduction to IoT by CISCO
• CSC : C, C++, Java, HTML, Ruby	• Introduction to Data Science by CISCO
• AWS : AWS cloud partitioner	• Introduction to Modern AI by CISCO

ACHEIVEMENTS AND VOLUNTEERING

• Web3conf;25 : Winner 2 nd place	• Amaravathi Quantum valley Hackathon Finalist
• Leetcode : 720problems solved , 1514 contest rating	• NASA Space Apps Challenge 2025 - Finalist
• Cardano 25' [Bangalore] -Top 5 among 1000 global teams	• Saastra 26' IITM [visa] : Top 10 among 800 teams
• HackIT'25 - GydeXP x IIT delhiFinalist among 1300+ teams	• Event - Department Symposium

TECHNICAL TOOLS

• VSCode (Code Editor)	• SQL Workbench (DB Management)	• Docker Desktop (Containerization)
• PostMan (API Testing)	• Blender	• Vercel (Cloud Hosting)
• Git/Github (Version Control)	• RemixIDE	• Firebase (App Backend)
